SUMMARY

Senior Full Stack Developer with 4+ years of experience building scalable web and fintech applications across frontend, backend, and cloud infrastructure. Experienced in leading product development, modernizing engineering workflows with CI/CD and micro frontend architecture, and designing reliable systems that support business growth. Passionate about solving complex technical problems and delivering products that create real user value.

WORK EXPERIENCE

SingaPay

Senior Full Stack Developer (May 2026 - Current)

- Lead the development, maintenance, and enhancement of high-availability financial service applications using PHP Laravel, Golang, and React.js.
- Serve as the primary engineer for Virtual Account services, leading end-to-end integrations with major banking institutions and third-party payment providers.
- Expanded Virtual Account integrations from **4 to 11 banking partners**, enabling broader payment coverage and improved merchant accessibility.
- Lead the revamp of the Payment Link platform by redesigning its architecture to improve maintainability, scalability, and user experience.
- Drive the end-to-end development of International Money Withdrawal features, including business flow design, database schema architecture, and system implementation.
- Support a global merchant ecosystem of **250+ active merchants**, with the platform processing **over IDR 7 billion in daily transaction volume**.
- Participate in system architecture and database design discussions, delivering scalable and maintainable technical solutions aligned with business objectives.
- Collaborate closely with Product, Business, and Engineering teams to define and refine Product Requirement Documents (PRDs), ensuring technical feasibility and efficient delivery.
- Serve as the senior engineer within a **5-member engineering team**, contributing to technical leadership, architecture decisions, feature planning, production troubleshooting, and platform performance optimization.

Key Focus: Fintech • Payment Gateway • Banking Integrations • System Architecture • Leadership

Sprint Asia Technology

Full Stack Engineer (June 2024 - April 2026)

- Led the development of Prezent Loyalty using React.js and Golang, delivering scalable customer loyalty solutions.
- Introduced GitLab CI/CD pipelines, reducing deployment time from **15+ minutes of manual deployment to under 5 minutes** while improving release reliability.
- Owned end-to-end DevOps operations, including server provisioning, Docker containerization, and Nginx configuration, helping maintain approximately **99% production uptime**.

- Led the migration from a monolithic frontend to a micro frontend architecture, improving scalability, modularity, and team productivity.
- Designed and implemented architectural improvements that enhanced application performance, security, and maintainability.
- Delivered core modules including Campaign, Redeem, and Progressive Web App (PWA).
- Served as the only Full Stack Engineer within a **5-member engineering team**, bridging frontend, backend, infrastructure, and deployment responsibilities.

Key Focus: Loyalty Platform • Micro Frontend • DevOps • CI/CD • Full Stack Development

Kolabora Group

Front End Developer (Sept 2022 - May 2024)

- Led the end-to-end development of Kolabora Smart System (KSS), an all-in-one enterprise productivity platform built from the ground up.
- Developed scalable web applications with React.js and Next.js and cross-platform mobile applications using React Native and Expo.
- Replaced paper-based reporting with a fully digital in-app reporting system, eliminating manual reporting workflows and improving traceability and cross-division collaboration.
- Led mobile application development within a **4-member engineering team**, mentoring another mobile developer and managing mobile feature delivery.
- Managed the complete mobile release lifecycle for both Google Play and the App Store.
- Designed scalable frontend architecture and implemented real-time chat functionality using WebSocket (Pusher).
- Delivered core business modules across HRGA, CRM, Finance, Warehouse, Project & Task Management, and integrated real-time communication.

Key Focus: SaaS Platform • Mobile Development • React Native • Leadership

PROJECT EXPERIENCE

- Payment Gateway system
- Digital voucher app
- Loyalty System
- E-Commerce app
- HR/Payroll app
- Real time chat app
- Project/task management system
- Accounting & Finance app
- Progressive Web Application (PWA)

EDUCATION

- **Purwadhika Digital Technology School (2022)**
Full Stack Web Developer
- **Trisakti University (2021)**
Mining Engineering

LICENSES & CERTIFICATION

- [Full Stack Web Developer \(Aug 2022\)](#)
Held by Purwadhika Digital Technology School
- [Purwadhika Best Student Award \(Oct 2022\)](#)
Held by Purwadhika Digital Technology School
